

I am an over the road trucker and I depend on XM Radio to furnish weather and traffic information for my business. On Thursday May 27 2004 there was a bad storm in Saint Louis MO and XM radio gave the information so I could avoid the routes where numerous accidents had happened. Because I travel all over the country, I have no idea which local stations furnish this information (when I can get a local station). XM is a valuable tool, local stations mostly give local news but not important news and entertainment I get from XM Radio. XM is always there when I need it.
I appose HR 4026.
